## EDUCATION

### B.E in Electronics Engineering

RTMNU Nagpur University

📅 2013

%  
64 / 100

### Post Graduate in Development & Advanced Computing

VITA Mumbai

📅 2014

%  
70 / 100

## TECHNOLOGIES

### Tech Stack

## EXPERIENCE

### Devops/Deployment Engineer

SAS R&D Pvt. Ltd.

📅 08/2017 - Ongoing 📍 Pune

SAS R&D India (Pvt.) Limited, is a key Research and Development Center for products and solutions of SAS. The Pune office, being the largest R&D center outside the US, has been focused on developing strategic products and solutions of SAS

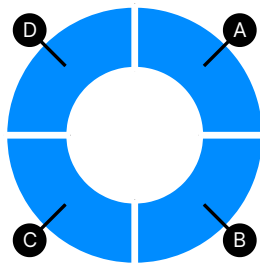

- Writing Ansible and Python scripts for automating the Deployment on Cloud platform
- Deployment Testing on various SAS products on various platform like windows, Linux, Solaris, Mainframes, AIX
- Configured Elasticsearch, Logstash and Kibana to analysis logs in our system

## CERTIFICATIONS

AWS Certified Solutions Architect – Associate  
[AWS](#)

Advanced SCRUM training certified from  
Cybage Software Pvt. Ltd  
[Cybage Software Pvt. Ltd](#)

## MY TIME

- A Managing Builds & Deployments
- B Supporting & Resolving Issues
- C Research and Development on new stack
- D Identifying & Writing Automation Scripts

## MOST PROUD OF

### Proposed ELK Stack

Proposed ELK stack to customer for log analysis, and implementing.

### Proposed and implemented ALM on working project both Onshore-Offshore

Proposed tools like Docker instead of using multiple VMs, code coverage tool, code analysis tool

### Winning Badminton trophies for company

My most loved hobby is playing Badminton and sometimes swimming.

## EXPERIENCE

Devops/Build Release  
Engineer

[Cybage Software Pvt. Ltd](#)

09/2014 - 08/2017 Pune

Cybage Software is a technology consulting organization specializing in outsourced product engineering services

- Build and deploy artifacts of different modules on QA servers using Jenkins and Shell scripts.
- Setup/Managing AWS services like VPC, EC2 on Linux Server application
- Established build process for iOS application using Jenkins and Clang Slang(static code analysis tool for iOS application)
- Monitor Builds, resolve system related issues and maintain 40+ QA servers on Client Side.
- Proposed new tools to Client to make the Development Lifecycle easier like Fisheye, Crucible, Zephyr
- Develop and maintain scripts used for QA
- Addressed Application Lifecycle management and tools in ALM from Jira as Software management tool to Docker as configuration management tool.
- Implemented CI and CD process in different projects using Jenkins and Bamboo
- Worked on Atlassian tools like Jira, Confluence, HipChat, Stash, Bitbucket, Bamboo, FishEye, Crucible, Clover, SourceTree, Crowd, JIRA Agile, JIRA Service Desk, JIRA Portfolio
- Proposed and implemented ALM on working project both Onshore-Offshore
